

Artist's Résumé

JULIE ERB

Boise, Idaho

Julie Erb graduated from Boise State University with a degree in Advertising Design and Illustration, but was interested in art from the time she was a young girl, due in part to watching her mother paint and seeing the joy she got from it.

Born and raised in Idaho, Julie's work has been inspired by the landscape around her, the beauty of ordinary objects that she could translate into something fun to view, and the internal character of people that can be expressed with a few brush strokes.

Striving for an impression of her subject matter rather than a photo-realistic portrayal in most of her work, she enjoys being playful with her brushwork and letting the color's intensity accentuate her work without over-powering it. As she continues to paint, she looks forward to always evolving and growing as a painter.
